

EMBARGOED UNTIL 8 OCTOBER 2019, 5PM

8 October 2019

News Release

**2019 FARE REVIEW EXERCISE
Enhanced Concessions for Polytechnic and other Diploma Students;
Increased Assistance for Lower-Income Groups**

Up to \$1.54 fare savings per journey for more than 80,000 polytechnic and other diploma students

Card fare adjustments capped at 4 cents for around 2 million concessionary commuters

9-cent adjustment for adult card fares

The Public Transport Council (PTC) has decided in the 2019 Fare Review Exercise to grant enhanced concessions to ensure fare affordability for more Singaporeans. This is despite the higher cost pressures faced by public transport operators from rise in energy prices worldwide in 2018, local manpower wages and other macroeconomic factors. The fare formula protects commuters' interests and prevents public transport operators from fully passing down their cost increases to commuters.

2 Taking into consideration the various factors, the PTC will implement the fare adjustment in accordance to the fare formula. The adjustment in fares, applicable from 28 December 2019, is summarised below:

Commuter Group	Fare Adjustment
Senior Citizen	4-cent increase per journey (card fares)
Lower-Wage Worker	
Person with Disabilities	
Student (Primary, Secondary, JC and ITE)	
Polytechnic ¹ and other diploma students (New Scheme) (see Annex A)	Up to \$1.54 fare savings per journey (card fares)
Adult	9-cent increase per journey (card fares)
Cash Fares and Single Trip Tickets	20-cent increase
Monthly Concession Passes	\$1.00 - \$5.50 increase
Adult Monthly Travel Pass	\$8.00 increase

¹Today, polytechnic and other diploma students pay adult fares. With the change, polytechnic and other diploma students will enjoy student concessionary fares, which are capped at \$0.63 for each journey, instead of up to \$2.17.

Comparison of card fares for an average journey* (10km)

Commuter Group	Current (Cents)	New (Cents)
Senior Citizen	88	92
Lower-Wage Worker	110	114
Person with Disabilities	88	92
Student (Primary, Secondary, JC, ITE)	59	63
Polytechnic and other diploma students	139	63
Adult	139	148

**Does not include morning pre-peak discount of up to 50 cents for tap-ins at any rail station before 7.45am on weekdays (excluding public holidays).*

Balancing Affordability with Long-Term Financial Sustainability

Card fare adjustments capped at 4 cents for around 2 million concessionary commuters

3 Fares have become more affordable for Singaporeans over time. The monthly public transport expenditure as a percentage of household income for those in the second quintile household income group has dropped from 2.7% in 2008 to 1.7% (in 2018) over the past ten years. Over the same period, those in the second decile household income group saw a decrease from 4.1% to 2.4% (See [Annex B](#)).

4 Singapore's bus and rail fares also remain one of the most affordable among cities in the world.² A comparison of 10km journey fares across 12 cities, based on public sources, showed that Singapore's adult, senior citizen, and student fares remain affordable after the 2019 Fare Review Exercise (FRE) fare adjustments.

² Besides the improvement in monthly public transport expenditure as a percentage of household income, the 2019 Deloitte City Mobility Index also ranked Singapore as a "top performer" in overall transport affordability among 55 cities studied (including public transport, price of fuel, and parking).

EMBARGOED UNTIL 8 OCTOBER 2019, 5PM

Student Fares

Senior Citizen Fares

Adult Fares

Note: Based on 10km average journey fares (bus and rail), and adjusted to SGD using purchasing power parity. Other cities' fares are valid as of July 2019.

5 The Government has stated that it will continue to subsidise close to \$1 billion per year to renew rail operating assets, and another \$1 billion to subsidise bus operations every year. This translates to more than \$1 in subsidies for every journey.

6 In considering the fare adjustments, the PTC continued to safeguard the interest of the concession groups. Around two million commuters, or over 1 in 2 Singaporeans, will see a lower fare adjustment of 4 cents and below. The PTC will also extend student concessionary fare to polytechnic and other diploma students. More than 80,000 polytechnic and other diploma students will enjoy savings in card fares of up to \$1.54 per journey.

7 To further help lower-income households, the PTC will mandate SBS Transit and SMRT to contribute about \$3.89 million (\$1.88 million and \$2.01 million respectively), to the Public Transport Fund. This is more than double last year's contribution of \$1.75 million.

8 All commuters will continue to enjoy the pre-peak discount of up to 50 cents on their card fares, when they tap in at any rail station before 7.45am on weekdays (excluding public holidays). Commuters can also cut down on their travelling time and/or costs by taking advantage of the transfer rules to make multiple rail transfers or rail-bus-rail transfer.

Stronger Support for Lower-Income Groups

9 To help lower-income groups cushion the impact of the fare adjustment, the Government will utilise the Public Transport Fund to make available 50% more Public Transport Vouchers (PTVs) (up from 300,000) and increase the value of each voucher to \$50 (up from \$30 in the 2018 PTV Exercise).

10 In line with PTC's decision to grant a lower increase of 4 cents for concession fares, the Government has also decided to cap the fare adjustment at 4 cents for Lower-Wage Workers (LWW) and Persons with Disabilities. This will increase the discount enjoyed by LWWs from up to 20% currently, to up to 25% off adult fares, and benefit 211,000 LWWs on the government-funded scheme.

11 "Our bus and rail systems are improving. Public transport systems in many countries face the challenge of narrowing the gap between operating costs and fare revenue. Some of these countries adopt a more purist approach in balancing cost and sustainability. This is not our approach. The government, public transport operators, and commuters are stakeholders here. We have a transparent and objective fare formula that allows us to cap the fare increase and balance sustainability with fare affordability for Singaporeans. We also considered that the Government continues to finance the public

EMBARGOED UNTIL 8 OCTOBER 2019, 5PM

transport infrastructure heavily, and provide financial assistance for the lower-income households. I think we have arrived at an equitable, carefully calibrated and delicate balance in our fare decision,” said Mr Richard Magnus, Chairman, Public Transport Council.

Student fares are capped for journeys beyond 7.2 km.

EMBARGOED UNTIL 8 OCTOBER 2019, 5PM

Annex B

FACTSHEET

Fare Adjustment Formula

(Announced in Press Release dated 22 March 2018)

$0.5cCPI + 0.4WI + 0.1EI - 0.1\% + NCF$
 2019 maximum allowable fare adjustment quantum = 7.0%

Core Consumer Price Index (cCPI): the change in core Consumer Price Index over preceding year; 1.7% in 2018.

Wage Index (WI): the change in Average Monthly Earnings (Annual National Average) over the preceding year, adjusted to account for any change in the employer's CPF contribution rate; 3.5% in 2018.

Energy Index (EI): the change in Energy Index which is a composite of cost changes in electricity and diesel; 32.3% in 2018.

0.1%: Productivity Extraction factor set for 2018 to 2022.

Network Capacity Factor (NCF): the change in NCF over preceding year, which means capacity provision relative to passenger demand for the entire public transport system; 1.6% in 2018

1. The Public Transport Council (PTC), in deciding the fare adjustment this year, was guided by the fare formula applicable from 2018 to 2022. The maximum allowable fare adjustment quantum to be considered for this year's exercise is 7.0%. PTC has decided to grant the fare formula output of 7.0% in full.

2. The fare adjustment formula protects the interests of commuters by capping the adjustment, rather than leaving it to the operators to pass all costs through to commuters to bear. The fare formula output is contingent on the movement of its component indices.

Enhancement in Concession for Polytechnic and Other Diploma Students

3. Other than the Monthly Concession Pass, polytechnic and other diploma students currently do not enjoy discounted trip fares. As part of the Fare Review Exercise, the concession for polytechnic and other diploma students will be enhanced. With effect from 28 December 2019, polytechnic and other diploma students will enjoy the same discounted trip fares as other students.

Public Transport Fare Affordability

4. Affordability of public transport fares is tracked by the PTC to ensure that fares remain affordable. Fare affordability is tracked for the second quintile income group households representing the average public transport user, as well as the second decile income group households representing the lower-income public transport user³.

³ Statistically, deciles are groups of data that divide a sample of data into ten groups (or ten deciles) based on a particular variable. The first decile refers to the lowest 10th percentile group; the second decile refers to the 11th – 20th percentile group, and so on. The bottom 60% of households by income make up the majority of public transport users. As such, the second quintile households (21st – 40th percentile) are taken to represent the average or typical public transport commuter, and second decile households (11th – 20th percentile) are taken to represent the lower-income public transport user.

5. Public transport fares continue to stay affordable on the back of consecutive fare reductions as well as increases in wages. The indicators for second quintile households and second decile households show similar downtrends from 2008 to 2018 (Fig.1). These households have been spending proportionately less of their monthly income on public transport fares in recent years, i.e. public transport has become more affordable for these groups.

Fig.1 Public Transport Affordability Indicator

Impact on Commuters

6. For adult commuters using fare cards, fares will be adjusted by 9 cents per journey. Senior citizen and student concession card fares will be adjusted by 4 cents per journey.

7. Single trip ticket for train and bus cash fares will be adjusted by 20 cents.

Monthly Concession Passes

8. The prices of all Monthly Concession Passes will see adjustments, ranging from \$1 to \$5.50. The price of Adult Monthly Travel Passes will increase by \$8.

EMBARGOED UNTIL 8 OCTOBER 2019, 5PM

Public Transport Fund

9. To ensure that resources are available for those who need help coping with the upward fare adjustment, the PTC, since 2013, had recommended mandatory contributions by the public transport operators to the Public Transport Fund in years with upward fare adjustments. In doing so, the public transport operators share their gains with commuters. Taking into account the rail operators' poor financial position this year, the PTC has decided that SBS Transit and SMRT Trains should contribute 10% and 5% of their expected increase in fare revenue to the Public Transport Fund respectively, i.e. \$1.88 million for SBS Transit and \$2.01 million for the SMRT.

10. \$22.5 million will be required to fund 450,000 Public Transport Vouchers (PTVs) worth \$50 each, to help needy families cope with the fare adjustment. To ensure that the Public Transport Fund is sufficient to support this scheme, we note that the Government will be making a top-up of around \$6 million.

Impact on Public Transport Operators

11. The overall fare adjustment of 7% translates to an increase in fare revenue of about \$132.5 million a year. The increase in annual revenue for SBS Transit Rail and SMRT Trains is about \$18.8 million and \$40.2 million, respectively.

12. Bus fare revenues will increase by about \$73.5 million. The additional revenue is ultimately channelled to the Government and used to offset bus operating subsidies, estimated to be about \$1 billion a year currently.

Highlights of Public Transport Operators' Applications

13. SBS Transit cited that their rail operations have been facing significant cost pressures since 2013 as a result of the Downtown Line operation. Manpower cost has been rising due to the increase in headcount and salary adjustment to attract and retain staff. SBS Transit had applied for a fare adjustment of 7%. Overall, SBS Transit's train division has lost tens of millions of dollars in its latest reported financial year.

14. Similarly, SMRT Trains applied for a fare adjustment of 7% citing increasing operating costs for their rail operations. Maintenance-related expenditure, and repair and maintenance costs, in particular, accounted for 71% of rail fare revenue in FY2019, up from 62% in FY2018, as a result of intensified and comprehensive maintenance efforts. For FY2019, SMRT Trains recorded a net loss after tax of \$155 million, compared to a net loss after tax of \$86 million recorded in FY2018.

Annex C

- Adult card fares will increase by 9 cents per journey.
- Senior citizen and student concession card fares will increase by 4 cents per journey.
- Single trip ticket for train and bus cash fares will increase by 20 cents.
